

# BALD EAGLE

## Bald Eagle Fact Sheet

- Eagles have strong wings that help them soar up to 10,000 feet high and fly up to 30 miles per hour.
- They can also dive up to 100 miles per hour. (ZOOM!)
- Eagle's nests can reach to 8 feet wide and 13 feet deep.
- The name "Bald Eagle" comes from an older meaning of the word, "white headed."
- They have over 7,000 feathers!
- The bald eagle's range covers most of North America, including most of Canada, all of the continental United States, and northern Mexico.
- The further from the equator the larger the bald eagle. Bald eagles found in Alaska are the largest.

### Isaiah 40:31

But those who wait on the Lord shall renew their strength;  
they shall mount up with wings like eagles, they shall run  
and not be weary, they shall walk and not faint.
