

Leopard

Panthera pardus

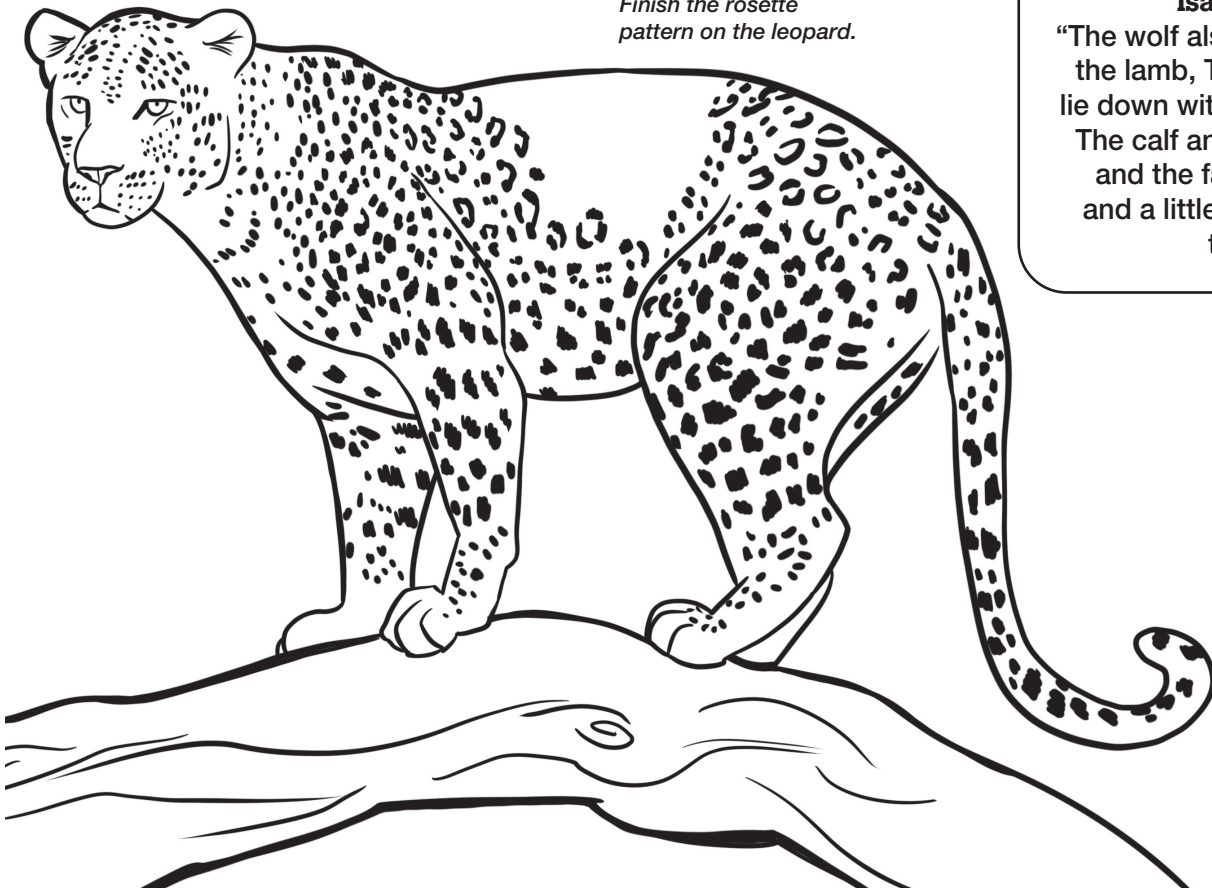

Leopard Facts

- There are nine (9) sub-species of Leopards (*Panthera pardus*).
- Leopards like to carry their prey up a tree to keep it safe from other predators. They are very strong.
- A black panther is actually either a leopard or a jaguar but with a darker melanistic color to it's fur.
- A leopards spots are called "rosettes," because they look like roses.

A leopard's rosettes

Finish the rosette pattern on the leopard.

Isaiah 11:6

"The wolf also shall dwell with the lamb, The leopard shall lie down with the young goat, The calf and the young lion and the fatling together; and a little child shall lead them."
